

COVID-19 (Coronavirus SARS-CoV-2)

1. Does the current situation influence GTP's delivery capability?

Production at all three of GTP's manufacturing locations in the U.S., Czech Republic and Finland is running normally; no impact on the ability to deliver is expected at the moment. However, we continue to monitor this dynamic situation. Our sales team will contact our customers in the event there is a change.

2. Is there an influence on the raw material supply of Global Tungsten & Powders?

No, since decades independency from China continues to be a core raw material supply strategy of GTP. Additionally, most of the raw materials used by GTP are generated through recycling of used tungsten and tungsten carbide products. In most cases, we have multiple sources that are outside of the designated risk areas.

3. Is there an influence on the production operations of Global Tungsten & Powders?

As listed in question 1 above, at the moment all three of GTP's manufacturing locations are running normally. In case we could experience limited workforce all our employees are highly trained in different production areas. Furthermore we can provide many products from different production locations.

4. What influence does the coronavirus have on site visits?

Safety and health are top priority concerns. We kindly ask customers and business partners to fill out our self declaration form before scheduling any site visits to one of our manufacturing locations. GTP employees were instructed to reduce business trips to an absolute minimum.

5. Are all sales teams available to assist as usual?

Yes, all contacts can be reached and are currently available as usual by phone and e-mail. However, office and field staff are advised to follow the travel recommendations of the World Health Organization (WHO) and not to travel to the designated risk areas.
